

AMC Technical Data Workshop

Data Exchange Session

Introduction

John Montgomery
Lead Engineer

AMC Engineering Data Management Systems
Program Management Office

Objective

- **To establish a strategy for achieving reasonably consistent Technical Data (TD) practices throughout the US Army Materiel Command (AMC) to optimize efficiencies and cost effectiveness.**
- Recommend AMC Policy changes that can be implemented immediately
- Identify issues and actions needing further resolution

Data Exchange ... A Large and Complex Area

Customer

Affects
Everyone

• Manage Data

Government
Primes

Automation is an
enabler for the
Business Process

• Acquire Data

Acquisition
Community
PMs, PEOs, Primes

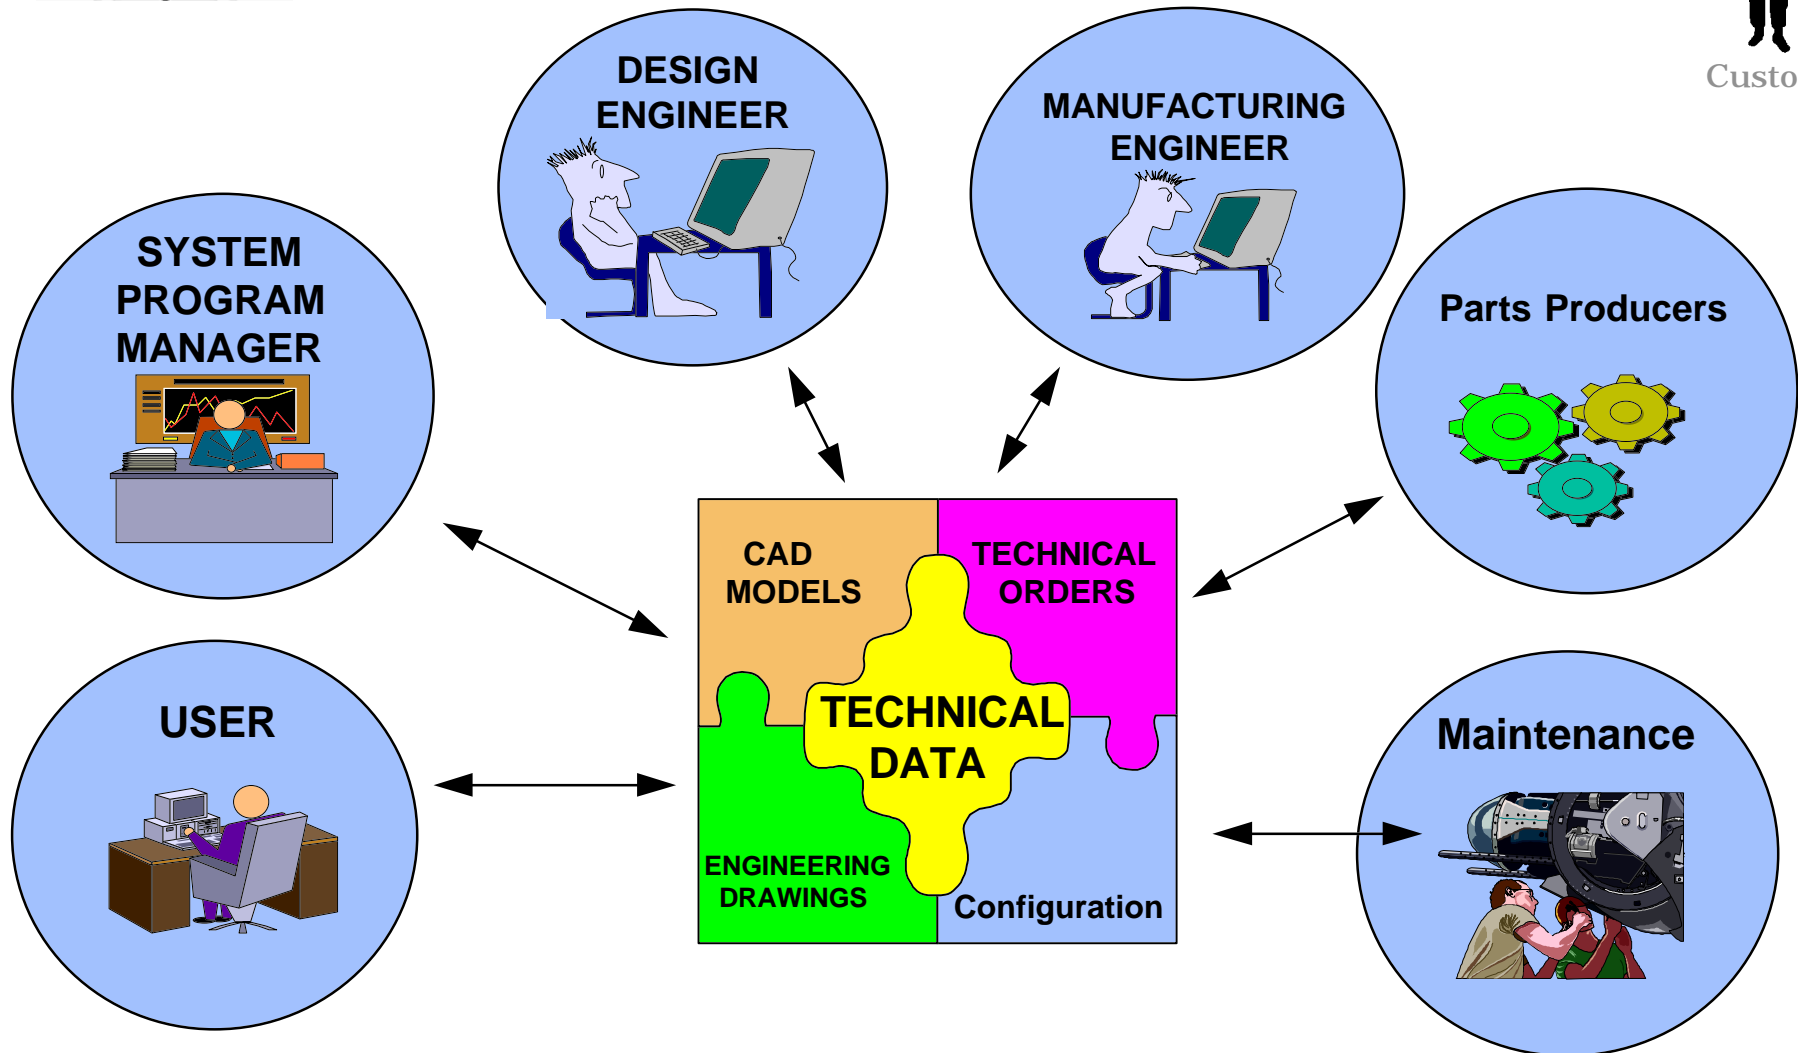

• Use Data

Logistics
R&D
Procurement
Sustainment
Communities

Many Types of Technical Data Needed for Different Purposes

Data Exchange ... Is not a new problem

**Large Corporate Asset +
a Legacy that can not be overlooked**

- Over 30 years of accumulated data
- AMC has over 10 million digital drawing images stored in DSREDS
- Millions more in non-digital form that are put into repository as needed
- Millions of Configuration Management Records
- Millions more data items managed by Primes

Technology Evolving Faster Than Business Processes and Automation

Evolving Legacy Environment

What Type Data Does Users Need ?

Customer

I require 200 dpi Raster Images

This system can't
handle CAD formats.

Data Exchange Standards ?
Tools to use multiple data types ?

Configuration
Management

DSREDS

Logistics

Why can't you use
my data format ?

Developer

CAD Formats
Vector Drawings

I need a drawing image ...
and I don't have a CAD system !

Spares Manufacturing

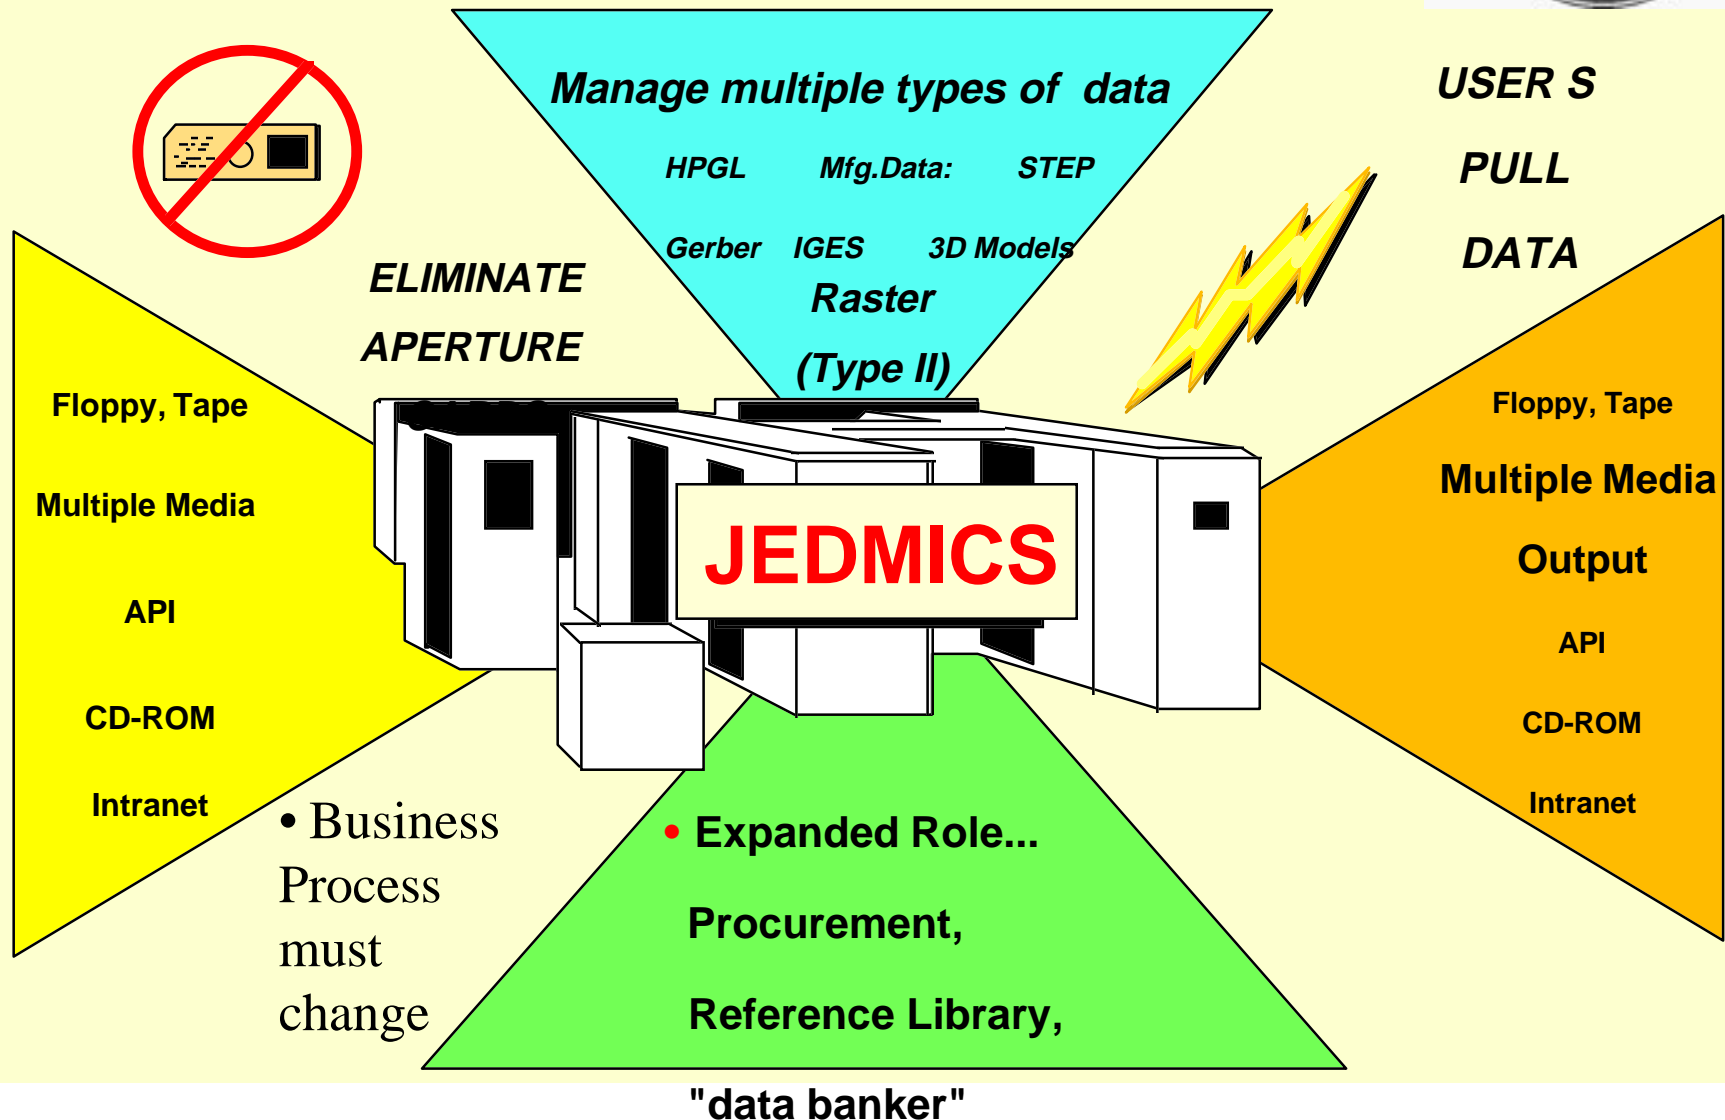

Sustainment

AMC's Technical Data Banker

Data Exchange Session Approach

Customer

- Acquire Data

Primary Source
Acquisition Community:
Primes via PMs, PEOs,

- Manage Data

Government Manager
+ Automation Systems

- Many Users of Data

Reference Source
Sustainment
- Spares Procurement
- Second Sourcing
- Logistics - Other Gov't
- Depot Repair

Policy, Practices & Procedures

Data Types & Structures

Methods & Tools

Automation Systems Capabilities & Compatibility

Data Exchange Session Focus

- Enablers to allow data exchange ... primary focus on technology
 - Discuss current and near term capabilities and limitations
 - Discuss industry, market trends and DOD directions
 - Discuss improvement options (immediate, near term, further study)
 - Discuss Risk level (low, medium, high) of options
- Identify business practices and barriers
- Coordination with other sessions
- Recommend AMC policy actions needed to facilitate progress

**Other sessions to
address business case**

Chairman: Facilitate the discussion process

Join me in room S-215

... and bring some good ideas !
